

I am a consulting electronics engineer with >20 years experience. I own and operate several independent internet websites and consult in the audio, television, and communications industries. I have studied the document:

"BellSouth Petition for Forbearance, WC

Docket No. 04-405" and in my professional opinion the petition should be denied in its entirety. The petition is technically absurd and if granted would cause great damage to my business.

Note that I use services of an independent ISP, Sonic.net, and I support their comments filed by Kristopher E. Twomey, Counsel, dated January 20th 2005.
